

Installing the MPLab IDE

1. Navigate into the **MPLab** folder
2. Navigate into the **Software** folder
3. Run (double click) on **MPLAB_v720_Install** to launch the installation
4. The Following screen will come up.

5. Click **Next>** to continue.

6. Accept the License and click **Next>**.

7. Make sure **Complete** is selected, and click **Next>**.

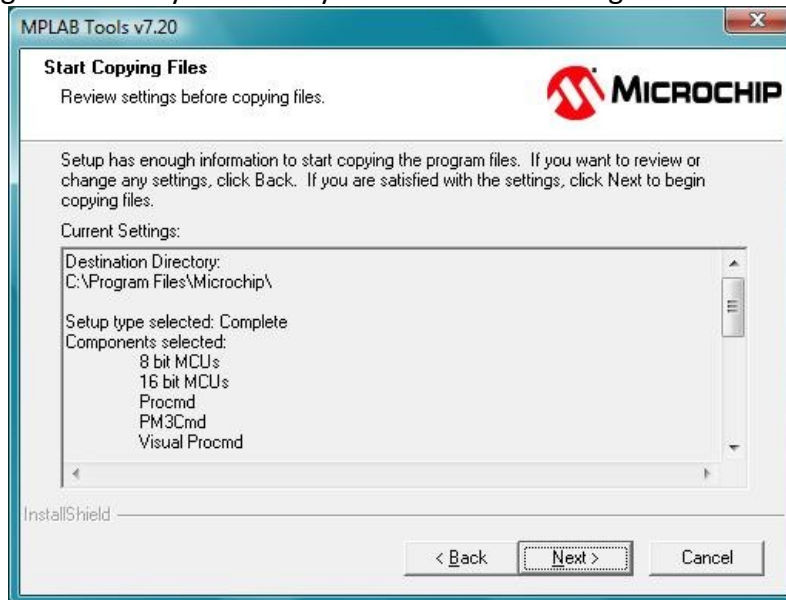

8. Leave the default installation path and click **Next>**.

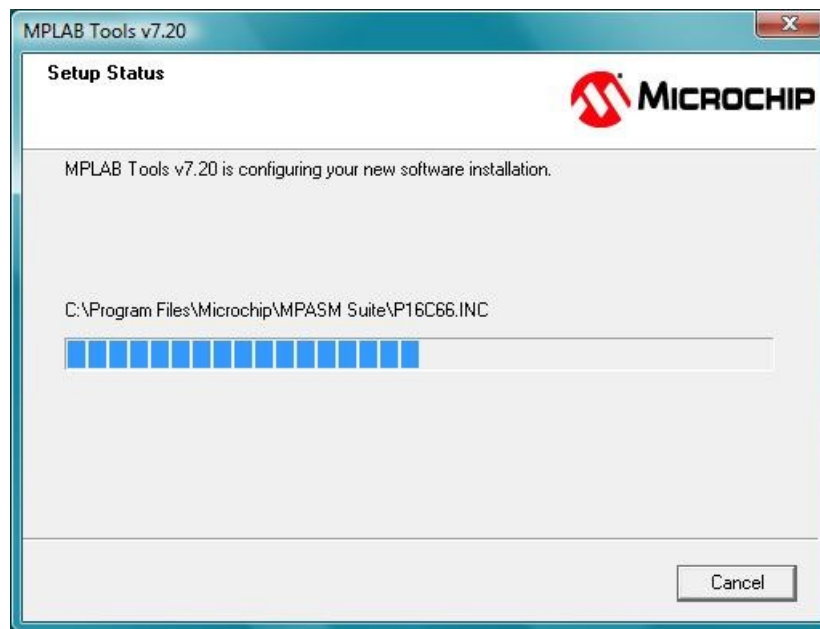

9. Accept this License agreement as well and click **Next>**.

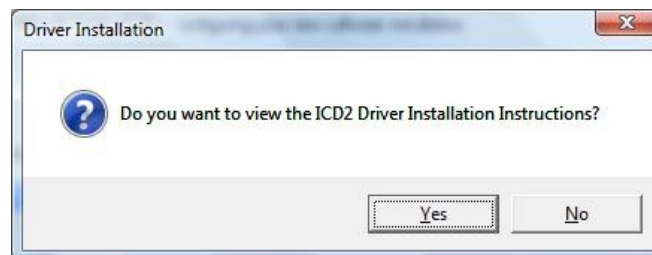

10. The Following screen lets you review your installation setting before continuing.

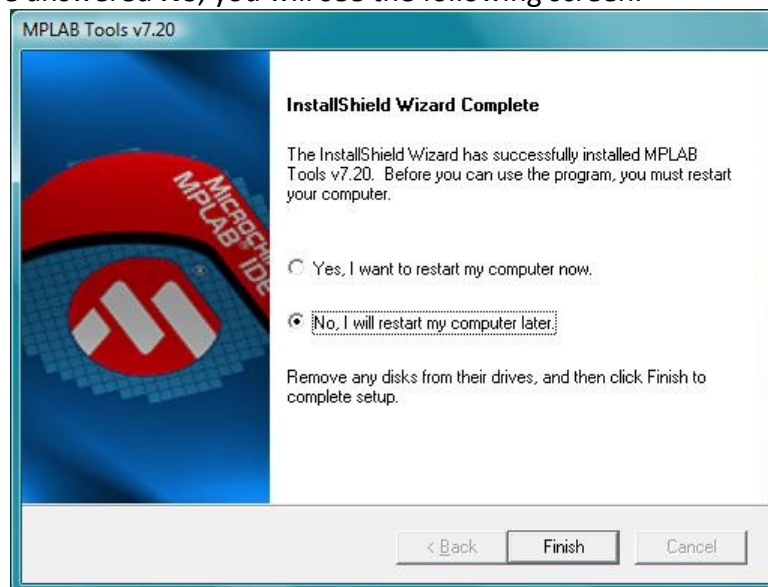

11. The default settings are ok, so click **Next>**.

12. You will see the above screen during installation. When installation has finished, a dialog will pop up:

13. Answer **No** to that dialog as well as the 3 others that follow it. (They will all look similar but will have different device names).
14. Once you have answered **No**, you will see the following screen.

15. You **DO NOT** have to restart your computer. Just click **Finish**.
