**Installing the IFI Vex Loader**

1. Navigate into the **IFI Loader Vex** folder
2. Run (double click) on **setup** to launch the installation
3. The Following screen will come up.

5. Click **OK**.
6. The next Screen lets you customize the Installation directory. The default path is **C:\Program Files\IFI_Loader**. Once you have set the directory (leaving default is recommended).

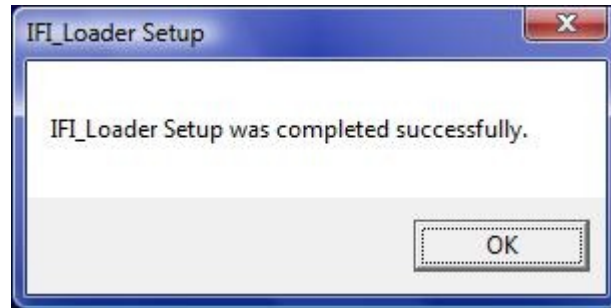

7. Click the *Computer Icon* to continue.

8. Click **Continue** on this screen.

9. The Setup will run and install the appropriate files. When it is done you will see the following window.

10. Click **OK** and installation is complete and will close.
