

LabVIEW Installation Notes

Andy Bardagjy - RoboJackets TE Sessions

September 15, 2009

1 Installing LabVIEW 2009

1.1 Windows

1. Insert installation DVD into drive
2. Click the installer to begin installation
3. Select only the base LabVIEW 2009 package
4. Agree to all liscenses, enter team name and serial number (ask a RoboJackets member)
5. Reboot when prompted

1.2 Macintosh

1. Insert installation DVD into drive
2. Click the LabVIEW 2009 installer to begin installation
3. Agree to all liscenses - OSX version does not require a serial number
4. Reboot when prompted

2 Installing the NXT and FTC Toolkits

2.1 Windows

1. Close LabVIEW
2. Download the NXT and FTC toolkits from <ftp://ftp.ni.com/evaluation/academic/ftcsoftwarewindows.exe> or from a RoboJackets member
3. First install the "NXT Module 2009 BETA" toolkit
4. Then install the "FRC 2010 Toolkit"

2.2 Macintosh

1. Close LabVIEW
2. Download the NXT and FTC toolkits from <ftp://ftp.ni.com/evaluation/academic/ftcsoftwaremac.zip> or from a RoboJackets member
3. First install the "NXT Module 2009 BETA" toolkit
4. Then install the "FRC 2010 Toolkit"

3 Finishing Up

When you plug in your NXT brick for the first time it should prompt to install USB drivers and update the firmware on your brick.
